

MR. NICHOLAS BWALLEY

Nationality: Kenyan

Tel: +254 714 394 332

Email: nickbiybwalley@gmail.com

CAREER OBJECTIVE

I'm a full-stack software engineer with a strong specialization in the MERN stack (MongoDB, Express.js, React.js and Node.js). While my expertise extends to various programming languages like Python, C#, and C++, I'm particularly passionate about building modern web applications. I'm actively expanding my skillset to integrate and automate tasks using AI and Machine Learning. Notably, I am a highly proficient typist, typing at average speed of 120 wpm, enabling me to efficiently tackle projects and meet deadlines. I thrive in collaborative environments and leverage version control systems like Git (GitHub) to seamlessly work within teams.
